## SLIMMING TREATMENTS

### FIR SAUNA BLANKET

#### **Burns up to 600 calories in 30min!**

DID YOU KNOW? Approximately 50% of the energy generated by your own body is in the form of FIR rays.

So FIR is completely safe.

Unlike Ultraviolet light, FIR rays do not cause sunburn or damage to your skin.

FIR energy can permeate deeply into the body. Its effects reach the skin, muscles, tendons, and ligaments.

A FIR sauna blanket transforms from light energy to heat energy, thus warming your body from the inside out without warming the air around you.

During your 30min session, the controlled, timed heat promotes the elimination of fats, chemicals and toxins from the blood through sweating and through the liver, kidneys.

#### **BENEFITS:**

## SLIMMING TREATMENTS

### 30K ULTRASONIC CAVITATION

#### How does it work?

This procedure involves applying pressure on fat cells through ultrasonic waves. These waves form bubbles around fat deposits under the skin. The pressure is high enough to make the fat cells burst and break down into a liquid form. The fat deposits are changed into glycerol and free fatty acids. Glycerol is then reused by the body while free fatty acids travel to the liver and are excreted as waste.
